

## **KMS SeaPort Prime Contract N00178-15-D-8290**

### **KMS Quality Assurance Summary**

Quality starts with the assurance by the Prime of absolute accountability to our Naval customers.

Through CMMI, our management team will continually evaluate performance based on technical approach, cost savings, timeliness and continuous process improvements. The individuals assigned to the tasks will participate with the government personnel in analyzing new requirements, making recommendations to correct deficiencies and discussing new capabilities to satisfy emerging requirements.

With Management commitment to quality (through accountability), the following KMS CMMI processes are implemented to monitor and maximize quality related to Navy efforts:

- Organizational Process Performance (OPP) - to establish and maintain a quantitative understanding of the performance of the organization's set of standard processes in support of quality and process-performance objectives, and to provide the process-performance data, baselines, and models to quantitatively manage the organization's projects.
- Process and Product Quality Assurance (PPQA) - to provide staff and management with objective insight into processes and associated work products.
- Quantitative Project Management (QPM) process area is to quantitatively manage the project's defined process to achieve the project's established quality and process-performance objectives.
